

Access to quality
care saves
children's lives

Better childhood cancer
survival across the EU

Together, we are stronger!

Children and teenagers with cancer
deserve the best treatment...
... no matter where they live

- All European children and adolescents with cancer should have the **same chances of being cured**, no matter where they live
- ExPO-r-Net is uniquely positioned to address the current **inequalities in childhood cancer survival and healthcare capabilities** across Europe
- This pilot project is developing innovative modalities for better treatment, care, and expertise-sharing by building a **European Reference Network for Paediatric Haematology-Oncology**
- The project is set to adopt **eHealth solutions** to move information and knowledge rather than patients whenever possible
- **Virtual European Tumour Boards** will enable access to expertise in paediatric oncology institutions where case numbers are low and only few reference sites exist
- The paediatric cancer community is strongly committed to **identify cross-border healthcare needs**
- Supported by the European Commission, ExPO-r-Net has been possible thanks to the **joint efforts of the paediatric haematology community**
